Fabic

Fabic is a Multi-Disciplinary Behavioural Specialist Centre, specialising in **understanding** and **changing** any unwanted behaviours used by children, teenagers and adults. At Fabic we understand that all behaviour is a form of communication and all unwanted behaviours are the result of not feeling equipped to respond to the challenges that life is presenting. We see this true for all unwanted behaviours, whether it be a child having a tantrum or an adult who uses behaviours consistent with being labelled an alcoholic. The unique methodology used across all Fabic services first seeks to understand the reason why behaviour is being used and then to support clients and their carers to develop the required skills so they now feel more equipped to respond to what life presents using new wanted behaviours.

Fabic has a multidisciplinary team and offers services in the following areas:

- Behavioural specialist consultations
- Psychology
- Speech pathology
- Occupational therapy
- Counselling

The following services are offered at Fabic:

- 1:1 consultations at Fabic clinic or via phone or Skype
- Assessment and treatment
- Social skills groups
- Off sight consultations in client's natural environment (e.g, childcare centres, schools, workplace, homes or any other relevant location)
- Staff training and professional development in behaviour related topics
- Workshops (<http://www.fabic.com.au/workshops-presentations>)

Helping Children with Autism and Better Start for Children with Disability funding can be used at Fabic
