

Referral Template Installation Guide – Best Practice

To download referral templates go to HealthyGC website: www.healthygc.com.au and click on “Referrals” then “Referral Templates”.

We recommend that you delete all the old referral templates from your practice software after you have installed the new suite. Deleting the old templates after uploading the new ones will ensure that templates are available to refer patients during the upload time.

To unzip a file

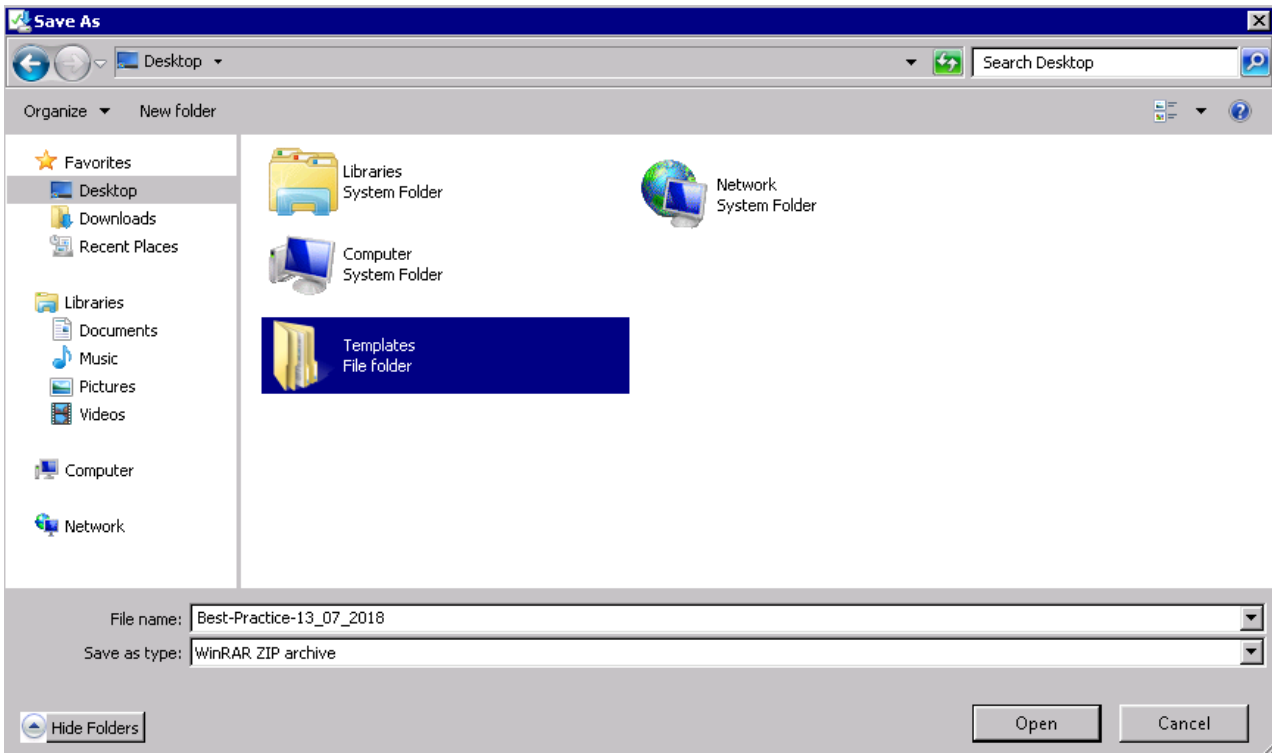

1. On your Desktop create a folder for the referral templates (right click > **New > Folder**)

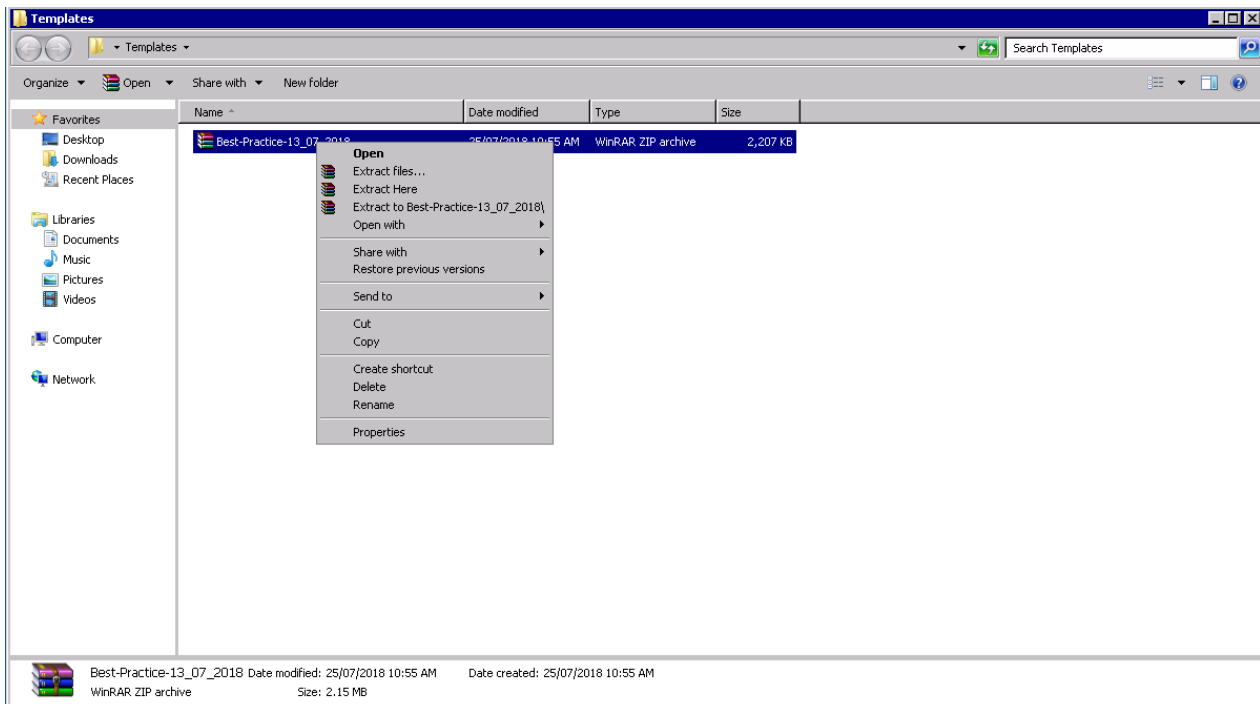

2. On HealthyGC referrals webpage, click on Best Practice link under Zipped Software Files for template to be downloaded > select **Save As**

3. Select your new Folder on Desktop and click **Save**.

4. You will now need to Unzip the files in the folder. Go to your desktop and find the folder where the templates are saved. Open the Folder > Right Click on the Document and choose **Extract Files**.

- When the Dialogue box opens, click **OK**
(please note that this step could look different depending of the operating system of your computer)

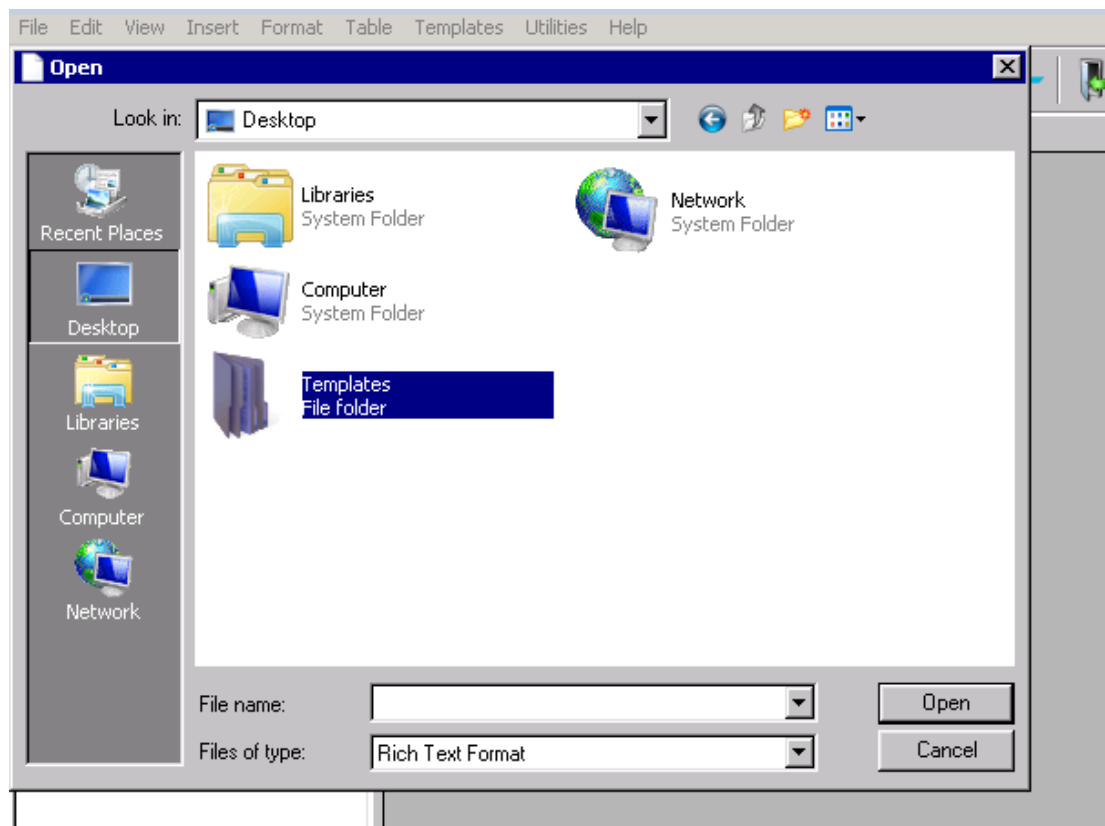

To install new templates into Best Practice:

- Open Best Practice and then Open Word Processor
- Templates > Import template**

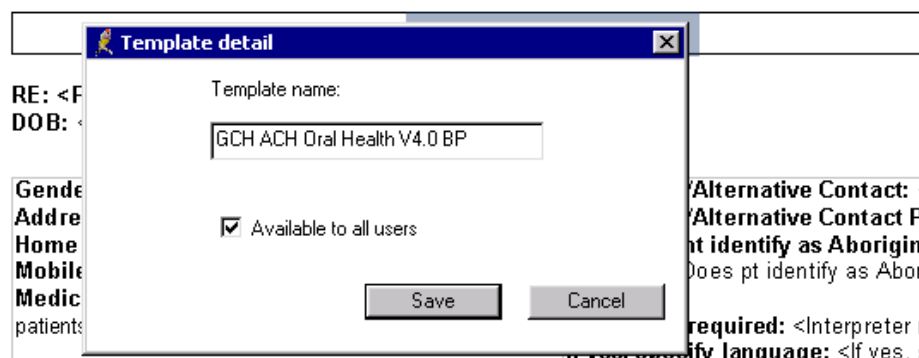

3. Locate downloaded templates on your desktop and click **Open**

4. Select the template you wish to install and it will then open
5. **File > Save As >** type in template name, tick **“Available to all users”** box and click **Save**

Dear Dr Nagrani

6. Repeat steps 2-3 to install remaining new templates
